

## 18 NOTICE OF MOTION NO. - 1050 CR BRETT OWEN

The growth in the participation in basketball by Cardinia residents (particularly young people) has dramatically increased. We have seen many clubs substantially increase their number of teams. Due to the lack of courts there is minimal to no space now available for clubs to train. Programming of games are required to begin early mornings and finishing late evenings on weekends.

Therefore, council resolves:

- That Council officer's prepare a report for the February 2020 Council meeting detailing the current status of basketball in Cardinia.
- The report to include:
  - Current participation rates at council's existing council basketball facilities
  - Occupancy of courts across the municipality's courts.
  - What infrastructure requirements at existing facilities is required to maximise usage
  - Details regarding proposed additional courts, stadium extensions and the building of new basketball facilities and their expected timeframes.
